VVVF DRIVE

MICROPROCESSOR COMPUTERISED CONTROL SYSTEM

COP, LOP Push Buttons

Lift Motors

MRL Traction Lifts

- > Silent Due To Low Rpm of Motor
- > Acceleration & Deceleration Smooth and Constant
- > Quick Response to Car & Landing Calls
- > Performance Constant in All Seasons
- > When Stationary, Car Does Not Lose Level At Any Time
- > Upto 180 Switchings / Hour
- > Power Saver, Due To High Efficiency Of Installation
- > Clean And Neat Installation
- > Eco-friendly -does Not Require Oil For Working

Hydraulic

- > Noisy Due To High Rpm of Motor
- > Stopping & Starting Jerky and Changes With Temperature
- > Delayed Response to Car & Landing Calls
- > Performance Varies Greatly With Seasonal Changes in Temperature
- > Due To Valve Leakage, When Stationary, Car Loses Level And Pump Is Started To Relevel The Car. This Leads To Power Wastage And Creates Noisy Nuisance To The Household, Particularly At Night
- > Generally 70 Switching / Hour Without Heat Exchanger
- > Equipment Is Imported
- > Requires About 200 To 300% More Power Than Gearless Installation
- > Could Be Messy Due To Spillage Of Oil
- > Requires Oil, Is Potential Threat To Soil
